

The installation/use method of graphical programming software is shown in the following picture:

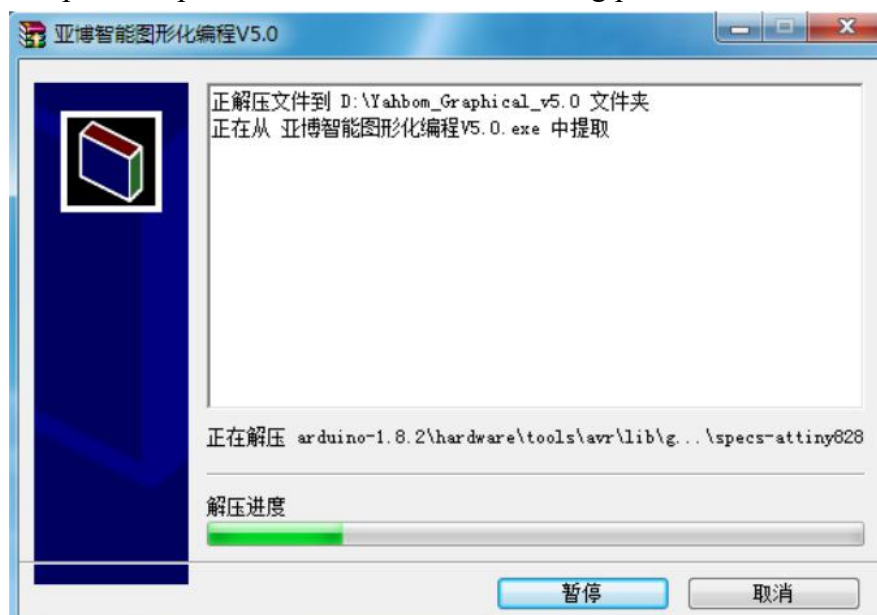

1. You need to double-click the installation package:

2. You need to decompress it.

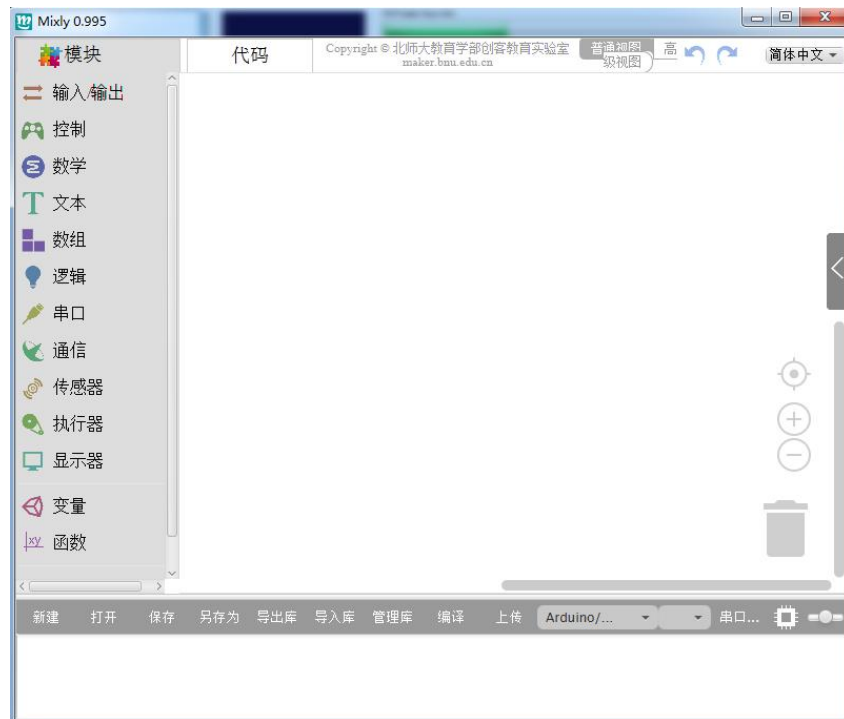

3. The decompression process is shown in the following picture.

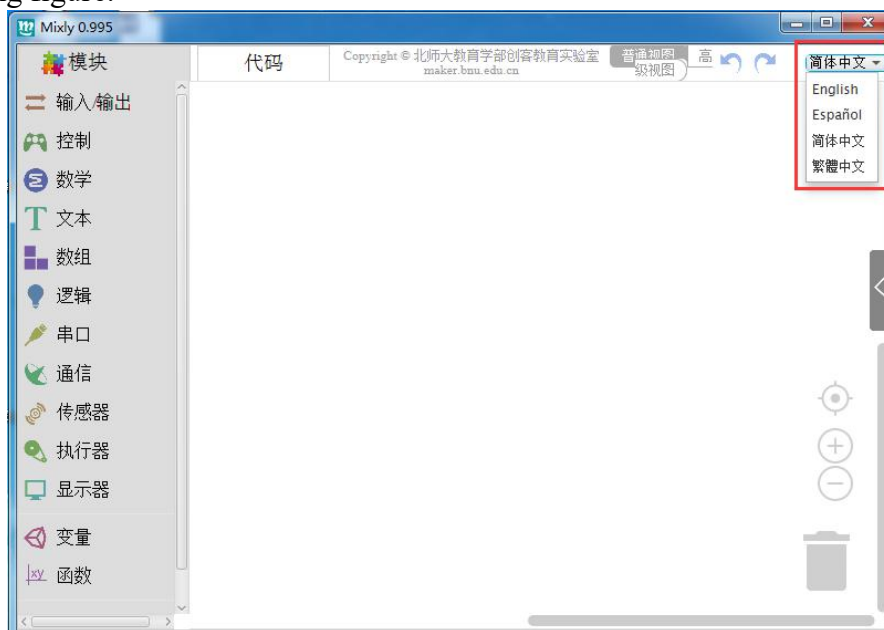

4. You need to wait for the progress bar to complete. When the shortcut to the software appears on the desktop, it means that you have successfully installed the software. As shown in the following figure.

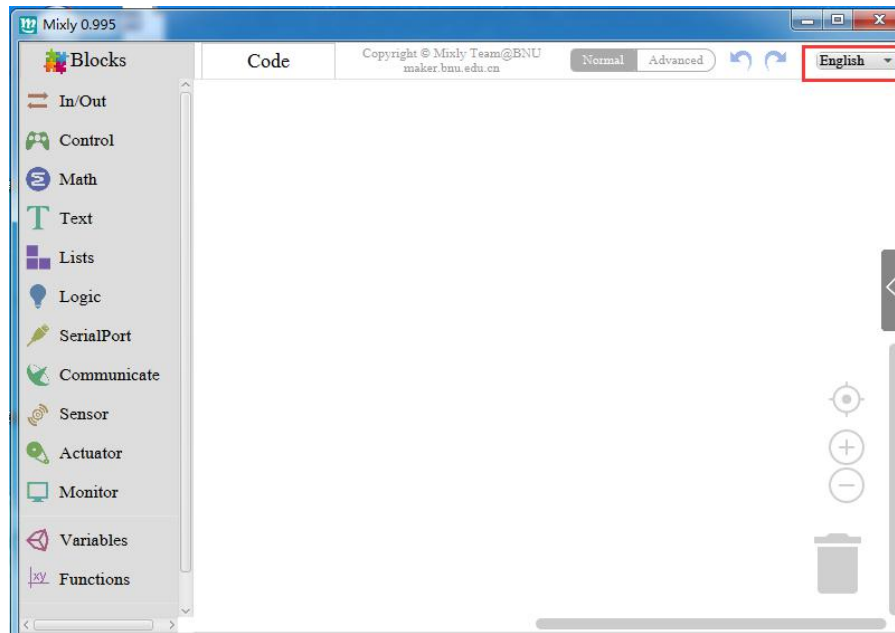

5. You can double-click to use it. As shown in the following figure.

6. You can click on the top right corner to change the language. As shown in the following figure.

7. After the switch is completed, you can see the English interface.

8. You can click monitor in the lower right corner to open the serial monitor. The baud rate needs to be set to 9600.
